Chapter 16: Evolution of Populations 16.1 Genes and Variation

16.2 Evolution as Genetic Change 16.3 The Process of Speciation

Evolutionary thought today is tightly linked to genetics.

Remember, populations, not individuals evolve. All the alleles in a pop. added together are called the gene pool .

Chapter 16 Evolution of Populations 16-1 Genes and Variation  
Darwin's original ideas can now be understood in genetic terms. Beginning with variation, we now know that traits are controlled by genes and that many genes have at least two forms, or alleles. We also know that individuals of all species are heterozygous for many genes.
