Lister SR2 Diesel engine

Lister also built light trucks fitted with their engines, for use around factories. From 1926 to 1968 they built light narrow gauge railway locomotives, weighing as little as 1½ tons, typically used by small brickworks and on peat bogs. The locos were often characterised by a total lack of bodywork; sometimes they had the luxury of an all over roof supported by four corner posts.

R A Lister and Company - Wikipedia

Deep, deep within the insides of a Lister SR2, we find the crankshaft and bearings. This engine has turned up as it has an unpleasant rumble in it's guts - a tricky thing to diagnose. Having pulled it apart, this is what i found: Big end 1: Not too bad, this one. A little scoring in the centre where the oil feed is, not unexpected in an ...

Lister SR2 - Primrose Engineering

On the left of the picture is the back end of the engine, showing the flywheel, with fan blades which push the air around the engine for the cooling. At the back in the middle is the fan guard, and then attached is part of the gear box casing. At the front are the cylinder blocks, with vents to aid cooling.
