With the spread of the germ theory of disease causation in the second half of the nineteenth century, new developments in bacteriology spurred

File Type PDF New Developments In Tropical Medicine li

the creation of 'tropical medicine' as a discipline focused on the diseases of warm climates. This specialisation was particularly associated with the pioneering work of Patrick Manson (1844-1922), who identified mosquitos as a vector of disease, and founded the London School of Hygiene and Tropical Medicine in 1899. Yet while research in
